To register for MySpeedy, simply download an application form at speedyservices.com/about-myspeedy and email a completed copy to myspeedy@speedyservices.com. You will be set up and will receive your login details via email.

Safety

We are the safest hire provider in the industry, based on accident and injury rates (seven day+, specified and RIDDOR injuries).

In 2017, we gained a Considerate Award in London and were awarded the RoSPA Gold Medal for safety performance for the third year running. We have been accredited to gold standard under the Fleet Operator Recognition Scheme (FORS) and have won awards for our vehicle fleet including Fleet Van Operator of the year (Motor Transport Awards) 2017.

We are committed to keeping our customers and employees healthy and safe. We invest in our Intelligent Safety programme, which is a free online resource dedicated to raising awareness, knowledge and skills across key safety themes:

- Dust control
- Hand arm vibration
- Noise
- Manual handling
- Slips, trips and falls
- Working at height
- Confined space/ATEX

The impact of work-related illness and workplace injuries on the health of individuals, as well as the cost to business, is also immense. Speedy Intelligent Safety site (speedyservices.com/intelligent-safety) includes the latest, free health and safety information, videos, toolbox talks, pocket guides, industry news, and specific product/service recommendations.

Training

Speedy provides FREE Toolbox talks for site workers on our key health and safety issues: Working at Height, Hand Arm Vibration, Dust Control and Manual Handling.

All of our courses are certified and Speedy are proud holders of the prestigious Customer Service Excellence hallmark for the quality of our training and service.

From our extensive hire fleet Speedy can provide a range of equipment suited for the airside environment including:

Lighting Towers

The VB9+ is an exclusive poly shell LED lighting tower. With a mast that can extend up to 8.5m and rotate 340deg whilst illuminating 4,100sqm.

All units are fitted with the Amoss system as standard with wind stability up to 80 km/h. Other benefits include a 20% improvement to fuel consumption and 37% greater light coverage compared to previous models.

Low Level and Powered Access

Speedy have invested significantly in the area of working at height, bringing you the most modern, reliable fleet within the industry and next generation innovative products including our range of Electric Scissor Lifts which offer working heights between 5m and 18.5m.

A wider range of Access solutions are available through our newly acquired companies, Prolift Access and Platform Sales & Hire including; Articulating and Telescopic Boom Lifts, Trailer Mounted Access platforms and Specialist Platforms, also available through our Partnered Services teams.

Pipework and Engineering Equipment

Speedy provides a full range of specialist equipment for all Pipework, Engineering and Welding jobs from pipe cutting equipment and jointing tools to MIG or Inverter Welders as well as Electrofusion equipment and Plasma Cutters.

Lifting Equipment

Speedy provides a complete, specialist hire and supply service for lifting and material handling. Through our UK-wide network, including our specialist Lloyds British business, we can provide expert advice for any lifting requirements. Our wide range of applications includes Genie Lifts, Pallet Trucks, Chain Hoists, Alloy Gentries and all associated connectors and slings.

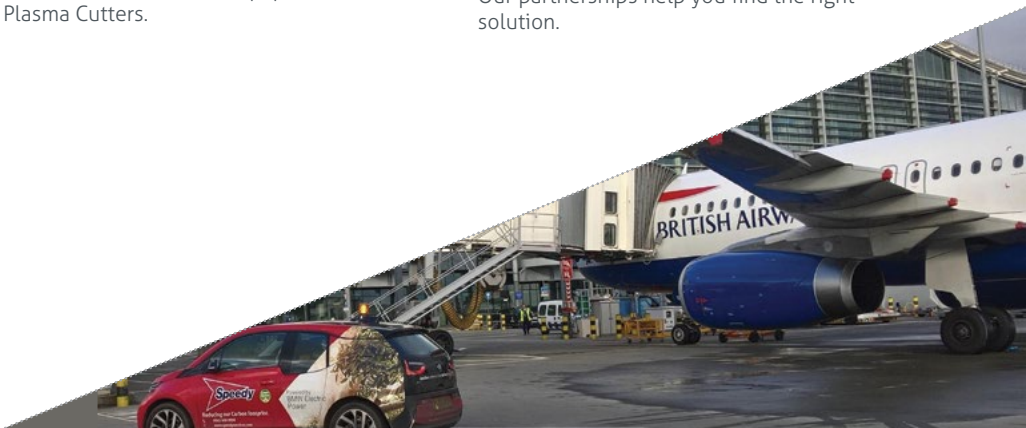

Partnered Services

We're passionate about meeting your requirements, no matter how big or small the request – our people are known for going out of their way to provide a solution.

Through our network of partners, we can provide any plant or equipment required, with or without skilled operators. Some of the most popular specialist hire items include:

- Accommodation
- Plant
- Waste Management
- Traffic Management
- Vacuum Extraction
- Pumps
- Heating and Cooling
- Water Treatment
- Cranes
- Security Control and CCTV

Our partnerships help you find the right solution.
