

TOTAL SITE SERVICES

Innovating for the future

Speedy

TOTAL SITE SERVICES FROM SPEEDY

INNOVATING FOR THE FUTURE

Our Site Services Team project manages your full site requirements.

Utilising our core hire fleet and selected rehire partners, to supply world class brands across a range of specialisms, we support you at every stage of your project.

Alongside Speedy's own range of hire and buy equipment we work with partner companies to source everything you need outside of our core range. Working with world-class brands, all recognised leaders in their own fields, all of Speedy's approved partners are formally assessed through a rigorous audit process, ensuring the very best quality of service is delivered, aligned to our values, and those of our customers.

To ensure continuously high standards, these audits are completed regularly with all partners. This means you benefit from the same peace of mind and high levels of service and standards of operational efficiency as you receive from Speedy. You can rest assured that you, your workforce and project are always in good hands.

Using Speedy as an extension of your own team means the cost and administration associated with hire is removed, as Speedy will liaise with your teams and effectively coordinate all of their needs on your behalf.

In addition MySpeedy, our free online account management tool gives you instant, secure access to all your hire information, together with a range of useful features - all in one convenient place. See what equipment is on hire, off hire in real-time, and set up regular automated management reports to your senior team and project leads to keep them abreast of what is going on out in the field.

INTRODUCTION TO THE SPEEDY SITE SERVICES TEAM

EXPERTLY EQUIPPED FOR EVERY STEP

As the UK's leading tools, equipment and plant hire company, we are equipped to support your business, at every stage of your on-site set up.

TAKING CARE OF THE EVERYDAY. EVERY DAY.

Speedy's Site Services Team takes away the hassle of everyday supply chain management, so you can focus on the more important

tasks. Think of us as an extra pair of hands, here to help you keep your project on plan and on track.

HIRE OR BUY

Products can be hired or purchased – choose from our wide range of over 2,000 product lines for hire and 8,000 to purchase. In addition we can supply non-standard items, which we source directly from our network of quality approved partners.

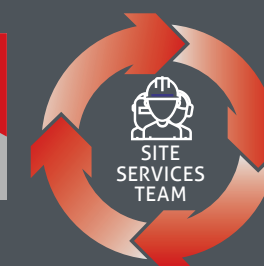

ENABLING SERVICES

- Arboriculture
- Landscaping
- Vegetation Management
- Ground Protection & Temporary Roadways

SITE MAINTENANCE

- Plant
- Transport
- Sweepers
- Waste Management

SPECIALIST SERVICES

- Drone Surveys

BRINGING
EVERYTHING
TOGETHER,
QUICKLY AND
EFFICIENTLY.

SITE SET UP

When you need a base for your projects, the Speedy Site Services Team can arrange all your fuel, power, welfare, security, lighting, storage and recycling requirements, plus much more, bringing everything together, quickly and efficiently.

An initial survey by our site planning team will help you determine your exact requirements, including the scope of essential set up items such as WiFi and CCTV to ensure connectivity and security, even in the most remote areas.

Ongoing site management services such as fuel deliveries, waste disposal and equipment compliance will help your compound run smoothly and efficiently, however long the job.

Our services are:

- > Industrial Painting
- > Arboriculture
- > Ground Maintenance
- > Landscaping
- > Vegetation Management

ENABLING SERVICES

CLEARING THE WAY

From expert grounds maintenance to vegetation management around electricity lines, waterways and highways, we offer a full range of environmental services.

We take pride in delighting our customers and ensuring that all we do enhances their reputation and brand.

GROUND PROTECTION AND TEMPORARY ROADWAYS

We provide a wide range of ground protection and temporary roadway solutions all fully installed, for a variety of uses, including football stadiums, wind turbine sites, access routes and at music concerts and events.

Advantages of using Speedy's ground protection solutions:

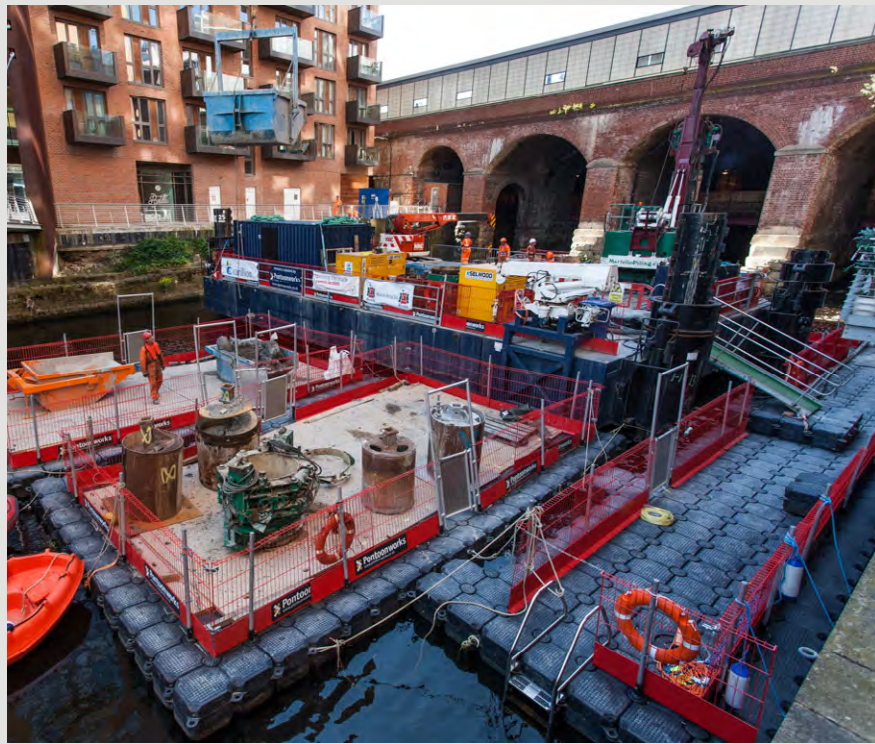

- > Fast and easy to install, temporary access and ground protection
- > Unique chevron traction surface
- > Fast temporary access, working areas and trackways
- > Low transport and handling costs
- > No ground preparation required
- > Effective fast and simple connection
- > Strong yet flexible - conforms to the underlying ground
- > Avoidance of property, heritage and environmental damage
- > Avoidance of health and safety issues caused by poor ground conditions
- > Range of connection options for different terrain and equipment

SPECIALIST SERVICES

FLOATING PONTOON WORKSTATIONS

Ensuring safe, stable platforms our pontoons are suitable for large scale civil projects, world class sporting events and temporary access to permanent installations for private individuals, we offer a comprehensive pontoon hire service.

Our pontoons are scaffold compatible, have numerous mooring options and can be configured around existing piles and structures. We will work with you to generate a structured timetable during multi-site operations to ensure efficient use of your resources. We can also offer a low profile solution where there is restricted height access under bridges.

SCAFFOLDING

Our range includes easy-to-assemble towers, GRP material products for sensitive environments and advanced guardrail options for hire and self-assembly.

In addition we offer scaffolding service solutions, whatever your scaffolding requirements we aim to provide the service you require promptly and professionally, from small aluminium scaffolding towers for smaller projects to erected steel scaffolding for larger commercial projects.

Contract size is unimportant and enquiries from individuals, local organisations, housing/commercial developers, refurbishment, factory maintenance and infrastructure are always welcome and each will receive the same high standard of safety and care.

DRONE SERVICES

Using the latest drone technology, we will provide you with a comprehensive aerial mapping and drone service.

Providing fully qualified drone operators, we use cutting edge unmanned aerial vehicle (UAV) and camera technology to capture high quality aerial data.

When conducting aerial surveys and inspections, our stabilised 4K imagery is suitable for a wide range of uses.

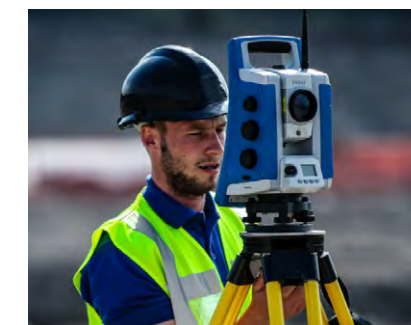

UAV surveying of rail infrastructure reduces the costs associated with

possessions and line blockades and gets boots off ballast. Sub-centimetre survey accuracies achievable and high resolution inspection imagery rapidly captured.

We can provide Rotary UAV solutions for inspection and 3D model capture and fixed wing UAV solutions for rapid mass data capture.

SITE SURVEYING

We provide the latest instruments from leading manufacturers.

We continue to invest in the most innovative survey products, all fully maintained and calibrated by our expert teams at our approved Leica Service Centres.

Alternatively we have the experience to complete the site survey on your behalf, delivering high-precision survey data, coordinated to all control networks. These include local, national and bespoke railway grids. Projects of all sizes can be catered for, varying from a single structure to large-scale, complex multi-discipline surveys.

- > Surveys
- > Drainage
- > Ground Investigation
- > GPR and Utilities

SITE AND TRAFFIC MANAGEMENT

We offer a full range of site and traffic management solutions for every size and structure of site, including a range of noise control solutions to form a barrier between the noise source and the receiver, reducing the impact on sound of the surrounding environment.

Speedy offers the complete site solution, all fully co-ordinated from a single provider.

- > Fencing
- > Hoarding
- > Barriers
- > Noise Control Barriers
- > Trenching
- > Edge Protection
- > Ground Protection

TRAFFIC MANAGEMENT

We have the capability to provide complete traffic management solutions to key market segments across the UK, including, local authorities, national highways, utilities, retail, TM contractors and events.

With our 12D and 12AB Lantra accredited operatives based nationwide, along with the most up to date innovative traffic management equipment and vehicles we can provide a full end to end traffic management service for our customers.

TEMPORARY ACCOMMODATION AND WELFARE

We have access to the widest range of temporary accommodation and welfare facilities on the market, providing an unlimited range of self-powered, self-sufficient mobile welfare buildings, ideal for working on remote sites where there is no electricity, water or drains.

Whether you are looking for an energy saving welfare unit, an anti-vandal welfare unit with ceramic flushing toilet or a welfare building with hydraulic lowering and retractable wheels, there is a towable welfare cabin to suit.

We supply office space, meeting rooms, canteens, secure containers, toilets, showers, or even sleeping facilities to solve just about every kind of space problem, and ideal for all kinds of industries including construction, commercial, industrial, nuclear, utilities and retail plus many more.

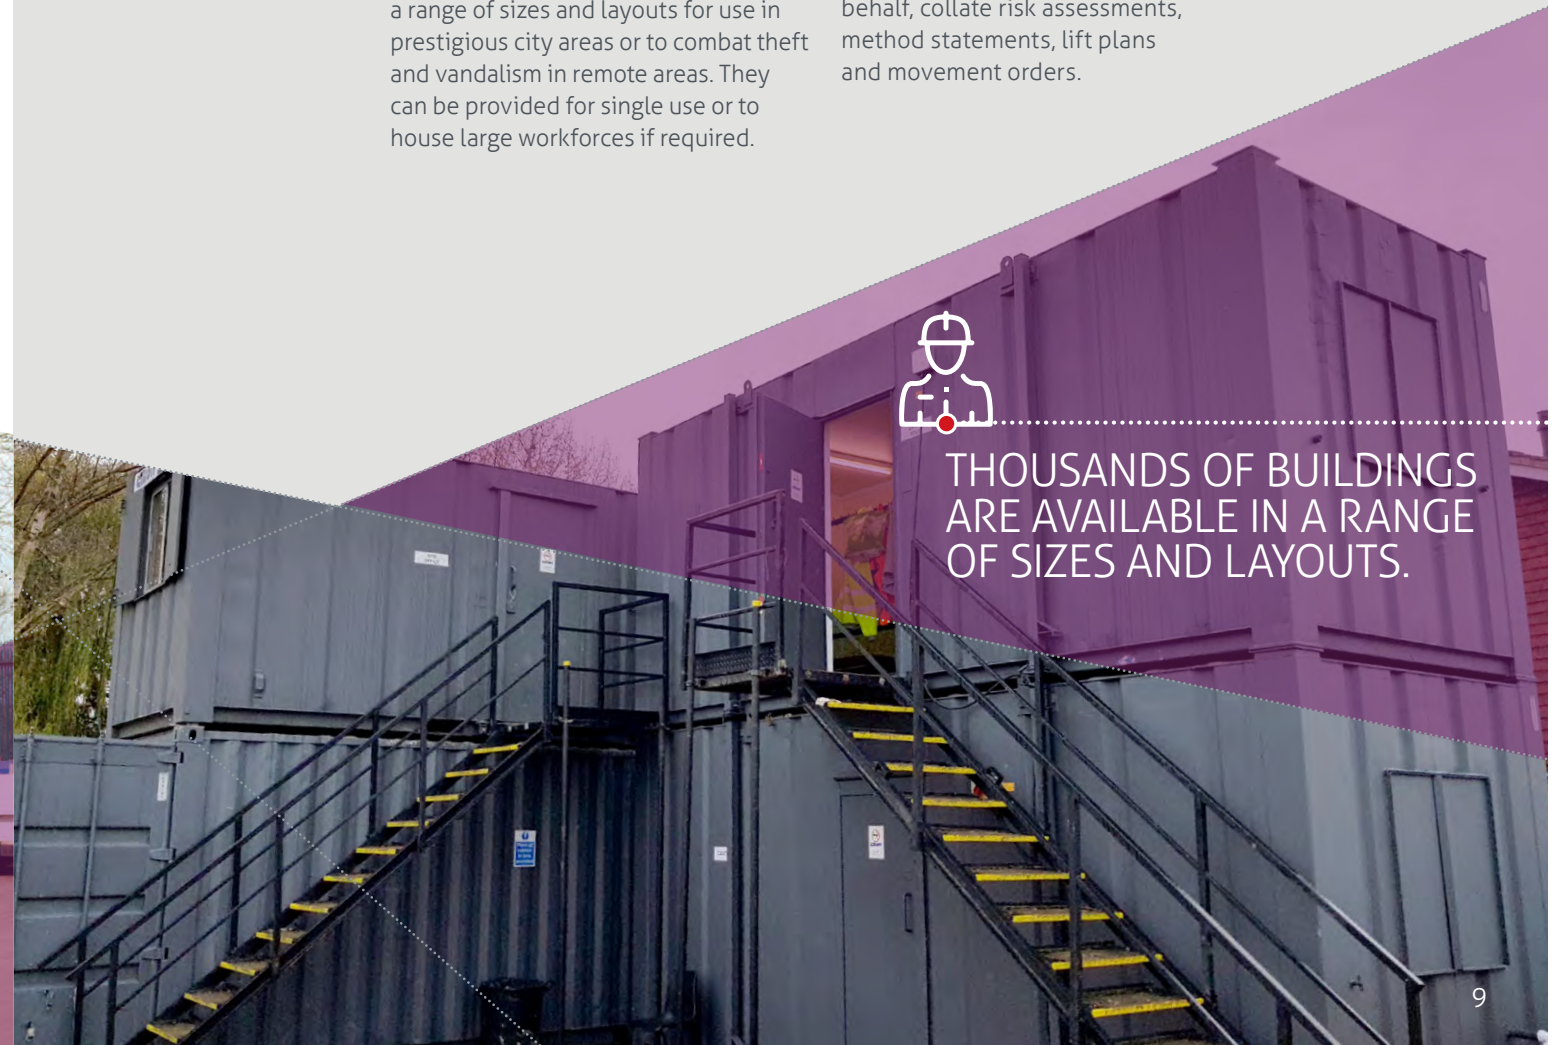

Thousands of buildings are available in a range of sizes and layouts for use in prestigious city areas or to combat theft and vandalism in remote areas. They can be provided for single use or to house large workforces if required.

We will work with our partners to get you the best possible price for the temporary accommodation and welfare to run your project. Our dedicated Site Services Team will arrange site surveys on your behalf, collate risk assessments, method statements, lift plans and movement orders.

THOUSANDS OF BUILDINGS ARE AVAILABLE IN A RANGE OF SIZES AND LAYOUTS.

MODUFLEX AND FIREFLEX RANGE

Provides flexibility with wide open plan workspace, ideal for construction complexes and events. Moduflex can be configured in a choice of layouts and installed to single or multi-story format.

FIREFLEX

An evolution of our popular Moduflex open plan temporary building solution with the added benefit of having a fire rated performance. Fireflex has been designed to meet the criteria set out in paragraph 13.3 of Joint Code of Practice 9th Edition for Fire Prevention on Construction Sites using components all tested by independent, third party accreditation bodies using European Standards. This product is fire rated by design.

MONOBLOCK

These units are a premium alternative to our standard anti-vandal range, with the same spec as our Moduflex product but offered as single units on a shorter lead time. These can be placed side by side with the same footprint as a double stacked anti vandal cabin, without the additional costs of stacking or staircases, and also minimising health and safety hazards on your site.

The Mono Block is available in 6 and 9 Meter lengths and has been designed from our popular Moduflex Product to meet requirements for site accommodation where Moduflex Complexes are not required.

ECO 10 AND X ECO MOBILE WELFARE UNIT

The Eco 10 and X Eco Mobile Welfare Unit offers the same benefits as the standard ECO7 with the optional addition of an inbuilt air operated 6mtr mast. The combination of tower light and welfare unit allows the work area of site to be lit by 4x100w LED heads. The fully remote controlled lights can be tilted, rotated and operated via the handset. CCTV can be added to the mast head and remotely monitored giving even greater flexibility.

ECOMAX 1750

It goes without saying that welfare supplied to your sites must meet all Health and Safety requirements. With our Oasis range we have always recognised that it is equally important to provide a pleasant working environment for the people using the welfare facilities.

We also know that as all sites are unique, it is important for sites to have the option to choose a welfare model which best suits their specific requirements. The Oasis EcoLogic range consists of a variety of models and sizes to cater for every site requirement.

ECO 7 MOBILE WELFARE UNIT

The Eco 7 Mobile Welfare unit is fully mobile and provides instant welfare facilities for 7 people. It is a market leading product with unique design features, including a fully retractable tow bar and hydraulics, allowing the unit to be lowered on site for safety and security.

WELFARE VAN

Our range of welfare vans provide a flexible approach to short term site accommodation and deliver comfortable and cost effective.

Mobile welfare for 7 people:

- > Messing unit housing all electricity auxiliary components with sink and microwave
- > Hot and cold water – 700 watt 12v water heater
- > Cabin heater
- > Interior LED lighting to mess area
- > VOSA type approved and HSE compliant
- > Separate toilet/WC with cassette, electric flush and wash facility
- > Full Chapter 8 Livery
- > Hard wearing anti-slip flooring

WHY USE INSTANT START WELFARE?

- > Can be towed site to site reducing transportation costs
- > Reduced fuel consumption, CO₂ and noise emissions
- > Instant site set up, no delays in waiting for deliveries
- > Easier access to rural locations
- > Complete with 4 x 100w LED lights with 360° coverage
- > CCTV with remote security monitoring
- > Reduced site footprint
- > Fully self-contained (protected from frost)
- > Network Rail approved
- > Can be supplied with all site welfare consumables
- > Rainwater harvesting

SNOOZEPOD

Designed and built for warmth and comfort, the SnoozePod 20 offers unrivalled levels of luxury in a temporary accommodation unit.

There are 2 bedrooms, 1 or 2 beds with reading lights, shelving, cupboards and a spacious wardrobe. Heating is via a 1.0kw plinth heater and lighting from energy saving LED lamps. Full kitchen facilities include: sink, microwave, kettle, fridge, hob, extractor and fridge.

A fire extinguisher, smoke and CO2 detectors are included as standard for additional safety. There are also useful USB and electric sockets. Ecosmart technology is built in as standard, this helps manage power demands in the most efficient way possible. Ideally suited for construction, student and outdoor events.

POWERSTATION

The solution to a cable-free site is finally here.

The new PowerStation unit has been specially designed to provide a safe space to charge multiple battery-powered items of construction equipment.

- > Reduce trip hazards - no more trailing leads
- > Reduces your carbon footprint
- > Reduces need for PAT testing
- > Centralised charging facility
- > No more interrupted works
- > Various charging options
- > Meets Considerate Constructors best practice
- > Mains or generator connected
- > Safe battery charging environment
- > Convenient and easy to use
- > 36 x Separate powered lockers with 230v RCD double sockets
- > 2 x 240v electric vehicle type charge points and 1 x 110v charge point (optional)

SOLAR LOOS

Offering a sustainable on-site energy source, our self-sufficient Solar Loos capture solar energy to produce sustainable, free energy whilst providing high quality sanitary facilities. You need to have a toilet on site, so why not make it solar and have it work for you whilst in situ.

Comfort, cleanliness and security remain paramount. Each toilet unit has a solid steel shell with deadlocks on all doors and features including a fresh water flushing porcelain toilet, stainless steel sink, mirror, coat hooks, soap dispenser, toilet tissue dispenser and an integrated first aid box.

AQUARIUS DISHWASH

SALAMANDER GRILL

UPRIGHT FRIDGE FREEZER

ELECTRONIC WATER HEATER

TEMPORARY KITCHEN HIRE

We have access to over 900 temporary modular kitchens, chiller units and catering equipment available to hire, for use during refurbishments, emergencies and events. With a huge range of sizes and configurations available, Speedy have commercial kitchens available as stand-alone units or as part of larger temporary kitchen complexes.

Each kitchen can be specified with your choice of catering equipment from the fleet of over 9,000 items, so whether you need preparation, production, ware washing, cold or dry storage, we can help.

SPEEDY CAN
SUPPLY WHATEVER
YOU WANT,
WHEREVER AND
WHENEVER IT'S
NEEDED.

POWER SOLUTIONS

We have everything you need to keep your site running whatever the conditions, with an industry-leading fleet of generators and compressors for every size of project.

As the UK's largest rental hire provider, temporary power generation forms part of our core product offering. We are proud of our ability to support our customers up and down the UK and across all sectors from construction, infrastructure, facilities, telecoms, petro-chemical, manufacturing, events, pharmaceutical or oil and gas.

Whether your requirement is for a single 20kVA generator or a multi-megawatt package we have both the equipment and the expertise to see

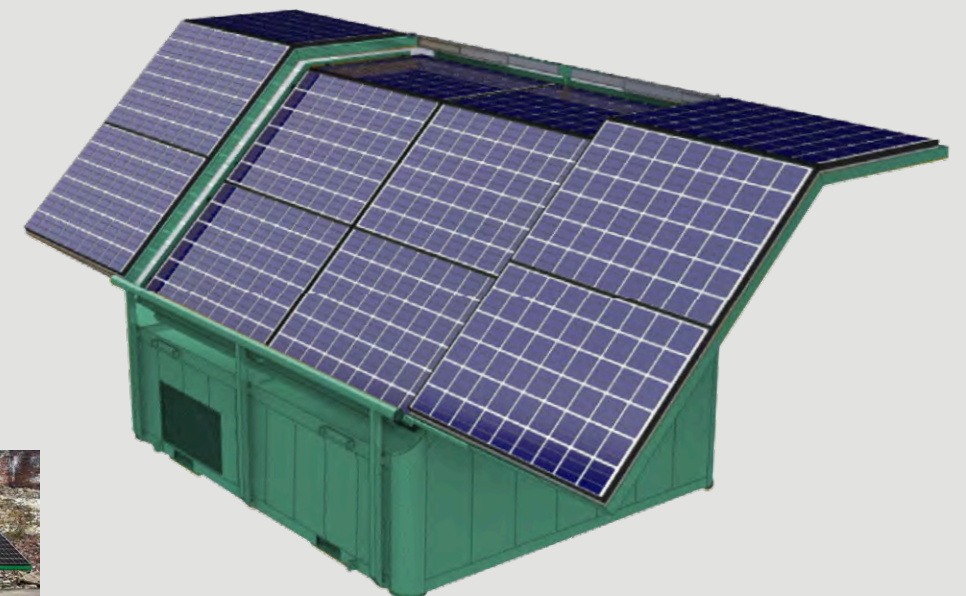

your project become a success. Our fleet is constantly being updated to ensure we are in a position to offer the most up to date, efficient and environmentally friendly assets in the UK.

To further complement our diesel fleet we also hold the UK's largest fleet of battery storage systems which, when matched to the right application and paired with a diesel set, can offer significant savings not only in fuel consumption but also in environmental emissions, both noise and CO2.

SOLAR POD

The Solar Pod combines solar PV, battery storage, a backup generator and a 400 litre fuel tank in a safe and secure self-contained unit. Perfect for medium sized sites, one Solar Pod can power as many as 5 cabins from a single Solar Pod.

Once connected by our trained engineers, powering the site is autonomous. The site is powered by Solar - Battery - Generator or a combination of these depending on the load demand. The Solar element will either power the site directly, or will assist by charging the battery storage.

SITE SECURITY

Speedy is the leading company for wireless security. With our design, manufacture and deployment of wireless systems we cover a wide variety of applications within commercial, domestic and industrial security.

Wireless alarms, wireless CCTV, wireless fire detection and evacuation systems, vehicle tracking and fleet management are all specialist areas in which Speedy will manage on your behalf.

For all security needs Speedy offers the most effective solution in terms of flexibility, efficiency and cost.

We provide a complete security service to our customers; from surveying and risk analysis to specifying the equipment solution.

Alongside the installation and maintenance of the equipment, together with monitoring and rapid security response, this all combines to make our service delivery the most complete one-stop-shop service available.

FOR ALL SECURITY NEEDS
SPEEDY OFFERS THE MOST
EFFECTIVE SOLUTION IN
TERMS OF FLEXIBILITY,
EFFICIENCY AND
COST.

ACCESS SECURITY

Our biometric access control software specifically designed for construction sites.

- > Fully integrated biometric access control software with construction tailored reporting
- > Get what you need quickly and easily

- > CSCS card scanning with validity checking and data import, time and attendance, local labour, local deliveries, apprentices, metrics, fire roll call, fire wardens and trained first aiders, user qualifications, contractors and trades

FIRE SECURITY

Sites must have adequate fire detection and evacuation warning systems in place to protect site personnel and to meet stringent insurance demands.

- > No cabling
- > Rapid installation
- > Compliant with JCOP recommendations for construction sites
- > Rented system – no capital outlay
- > Battery backup in the event of mains power failure
- > Fully monitored by our 24/7 central monitoring station

RAPID DEPLOYMENT CCTV

Ideal for temporary locations, eliminating the need for expensive wiring and installation costs.

- > Rapid deployment
- > Low maintenance
- > No noise
- > No emissions
- > No fuel costs
- > Hydraulic mast

TWO WAY RADIOS AND SYSTEMS

Communication is the backbone of any operation and we have a great selection of high quality two-way radios, repeaters and communication systems available.

Digital two way licensed hand portables and mobile radios from leading manufacturers both standard and ATEX (Intrinsically Safe) are available, including repeater systems for wider coverage with full installation service and extensive range of accessories to complement.

SITE COMMUNICATIONS:

RAPID, RELIABLE AND SECURE INTERNET SERVICES

With most construction sites offering limited access to the existing network infrastructure (and most landline network services taking weeks, even months to be provisioned), standalone wireless systems are by far the most practical option.

We have a range of ways to deliver services into any site using 3G/4G or satellite technology.

Our wireless network solution will be tailored to the size and data requirements of your site and will provide:

- > Competitive data charges on a par with fixed line services
- > Rapid deployment with no wait for a fixed line setup
- > Secure broadband connection
- > Fast installation and de-installation by expert engineers
- > Versatility and flexibility
- > Use our wireless system in multiple locations
- > Easy network management
- > 24 hour network access, even on remote sites
- > Voice over Internet Protocol allows phone calls to be made over the internet, improving call quality

COMPOUND LIGHTING

Speedy leads the way with the newest, most cost effective lighting solutions for even the most challenging on-site environments. High performance with high efficiency, discover our range of cost effective and innovative lighting towers, offering outstanding versatility and a wealth of energy saving features:

- > Solar Technology - sustainable lighting, reliable performance, low maintenance
- > Hybrid - combining diesel with high efficiency battery power for extended operation
- > Auto Light Sensing - providing optimum energy consumption, with light exactly when you need it

- > Advanced Battery Systems - High efficiency battery technology, offering longer life and automatic recharging

PLANT, TRANSPORT, ROADS AND GROUND MAINTENANCE

Speedy is a specialist supplier of plant, transport and ground maintenance services to a wide range of industries including construction, rail and aerospace. We strive to lead the industry by delivering the best in class levels of safety, services and efficiency.

Our Site Services Team combines the expertise of some of the UK's leading plant and haulage specialists with state of the art equipment and systems for any load you need to move.

PLANT

Combining an extensive range of plant with top quality, reliability and functionality, we have the right machine for all applications. We have all the latest plant and equipment to get the job done.

For all plant equipment hired on a non-operator basis, customers must confirm and prove that a trained and or competent person will be operating the equipment. For all hires of specialist equipment, proof of 'hired in plant' insurance will be required.

GENERAL TRANSPORT

Speedy can supply a Euro 6 compliant fleet of over 150 tractor units and 500 trailers with first-class innovations that enable us to be quicker, lighter, and safer. Our cutting edge fleet, which includes flat trailers, curtain-siders, step frames, low-loader plant trailers, concrete mixers and aggregate trailers, is assisted by our advanced bespoke transport management system and our confident, capable team.

15T-18T TRUCK MOUNTED SWEEPERS – OPERATED

Our 15t-18t truck mounted sweepers feature high specifications and are designed to handle even the most demanding of applications. These sweepers come with high-pressure spray lance and dual sweep for comprehensive sweeping capabilities. Our 15t-18t sweepers are available for operated hire, with fully trained and experienced operators to ensure safe and effective service delivery. Our fleet of 15t-18t sweepers is backed up by 24/7 fleet support from our expert technicians.

BACK TO BLACK BEAM SWEEPERS - OPERATED

Front mounted jetting system with a 3600 pneumatic pivot and fan jets.

Nearside and offside spray bars with fan jets, enabling close kerb work during street cleansing.

Full-width suction box with a full pressure spray bar and jets for an even deeper clean on all types of hard surfaces. High-pressure equipment providing approximately 300 bar/400psi, including a hose reel attachment for hard to reach or difficult areas.

COMPACT/PEDESTRIAN SWEEPERS - OPERATED

Compact pedestrian sweepers are available as part of our operated hire division, along with highly qualified and trained operators.

They are ideal for use in confined spaces due to their low weight and superior manoeuvrability. Their low, evenly spread weight ensures that they're suitable directly on pavements, slabbed surfaces and pedestrian areas. Available models include Johnston CX200, Scarab Minor and Schmidt Swingo. Our fleet of operated compact pedestrian sweepers are also supported by 24/7 fleet support and expert technicians to ensure superior service delivery.

GROUND MAINTENANCE

Speedy provide grounds maintenance and commercial landscape management from our strategic hubs across the UK. We can work to your exacting specification or create a solution tailor-made to your requirements. In addition to general maintenance including litter clearing, weed control, leaf clearing, tree services, beds and border maintenance, hedge maintenance and grass cutting.

We also provide more site specific services for different environments such as urban wildflower meadow installation, native species planting, tree planting, pond construction, wildlife gardens, habitat hotels, compost areas, invasive species control, bird boxes and feeder's, green walls and green roof installation. We are experts in sustainable planting solutions and use nectar bearing flowers to encourage butterflies, insects and birds creating real living landscapes that benefit people and wildlife.

SPECIALIST DRAINAGE SURVEYING

Specialist drainage surveying set up to meet the diverse needs of our customers. From initial assessment to cleaning, unblocking and remediation of drains. We put the customer at the heart of our surveys by understanding the specific and sometimes diverse reasons for undertaking the surveys. We are able to get the job done quickly and effectively, tailoring our services to meet your needs in a commercial or domestic environment.

WE STRIVE TO LEAD THE INDUSTRY BY DELIVERING THE BEST IN CLASS LEVELS OF SAFETY, SERVICES AND EFFICIENCY.

WE FOCUS ON QUALITY, SAFETY AND HONESTY. THESE CORE VALUES NOT ONLY EXTEND TOWARDS OUR CUSTOMERS BUT ALSO TO OUR SUPPLY CHAIN.

RAIL SPECIALIST SOLUTIONS

With a huge selection of railway equipment available to hire online at Speedy, you'll have everything you need for a project to run smoothly. From overhead line equipment to rail trolleys and rail beams, ensure you have high-quality tools for the job at hand.

We also have access to an extended supply chain of rail plant, equipment and labour services and our capabilities include infrastructure, construction works, and maintenance and upgrade works, project management and engineering services. The disciplines we cover include – but aren't limited to – permanent way, OHLE, civils, signalling and M&E. We're also able to cover asset management services.

In all things, we focus on quality, safety and honesty. These core values not only extend towards our customers but also to our supply chain.

- > Rail Civil Engineering Services
- > Road Rail Plant and Haulage
- > Rail Safety Critical
- > Rail Labour Supply
- > Railway Consultancy
- > Survey and Design Services

NETWORK RAIL APPROVED DUPLEX COMMUNICATIONS

At Speedy we supply Network rail approved Duplex Communications to keep you safe while both on and off the track.

3M VERSAFLO TR300+

The lightweight Versaflo TR-300 Powered Air Purifying Respirator is the key to easy-to use, versatile respirator systems for particulate environments. With its compact, well balanced and slim design, the Versaflo TR-300 powered air respirator is the answer to respiratory protection needs for many users.

- > Modern, well balanced design
- > Lightweight with excellent balance
- > Fully-adjustable head suspension
- > Air deflector allows users to direct the airflow inside for increased control and comfort
- > Head protection approved according to EN397

PROTECTION FROM DUST

Many work activities can create dust, and exposure to any dust in excessive amounts can create respiratory problems. We have a range of products which can help users to protect from dust.

POWERCAP® INFINITY® BY JSP

A fully integrated TH3 powered air respirator offering 4 of the highest level of protection in one intuitive head mounted unit. Giving the wearer complete above neck 4 in 1 protection. PowerCap® Infinity®, the perfect choice for many industries where dust poses a great danger to health. The unit provides the very latest in Powered Air Purifying Respiratory technology.

ATHENA, DBD COMMUNICATIONS AWARD WINNING SYSTEM

This Network Rail approved product provides two independent users up to 100 metres apart. There are many variations of the Athena available, we can tailor a specific solution dependent on your working environment or needs.

- > 2 user sets for RRV
- > 3 user sets for Tandem Lift

WASTE MANAGEMENT

We supply all types of skips and dispose of a wide variety of wastes, so wherever you are in the UK we will be committed to finding you a competitive price to meet your needs.

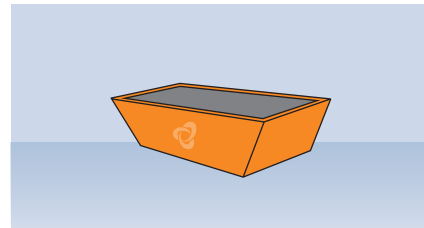

We are committed to the environment and work hard to ensure that we recycle as much of your waste as possible.

- > All skip sizes from 4 yard to 40 yard
- > Same day delivery

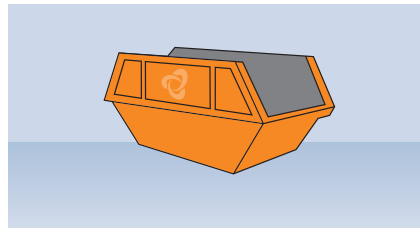

WASTE MANAGEMENT ONLINE PORTAL AVAILABLE, PROVIDING LIVE AND INSTANT ACCESS TO:

- > Online booking
- > Instant quotes
- > Up-to-date ETAs
- > Waste reports
- > Legislation download

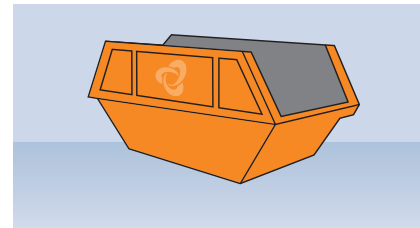

ALL POPULAR SKIPS AVAILABLE INCLUDING:

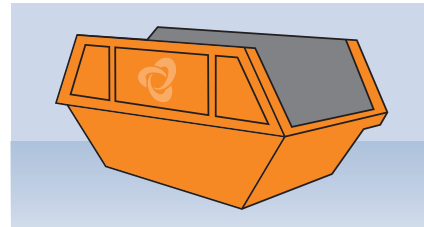

4 YARD
Perfect for small DIY projects or spring cleaning.

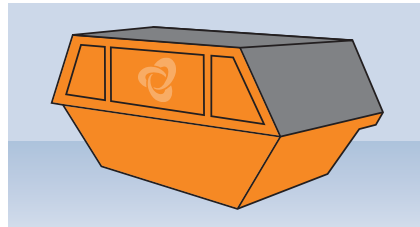

6 YARD
Great size for a bathroom refit or getting rid of garden waste.

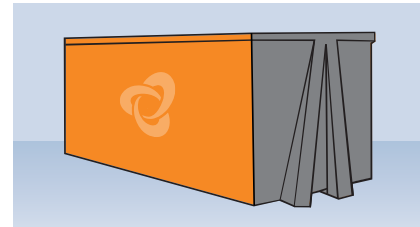

8 YARD
Built for most domestic waste removal jobs, such as kitchen replacements.

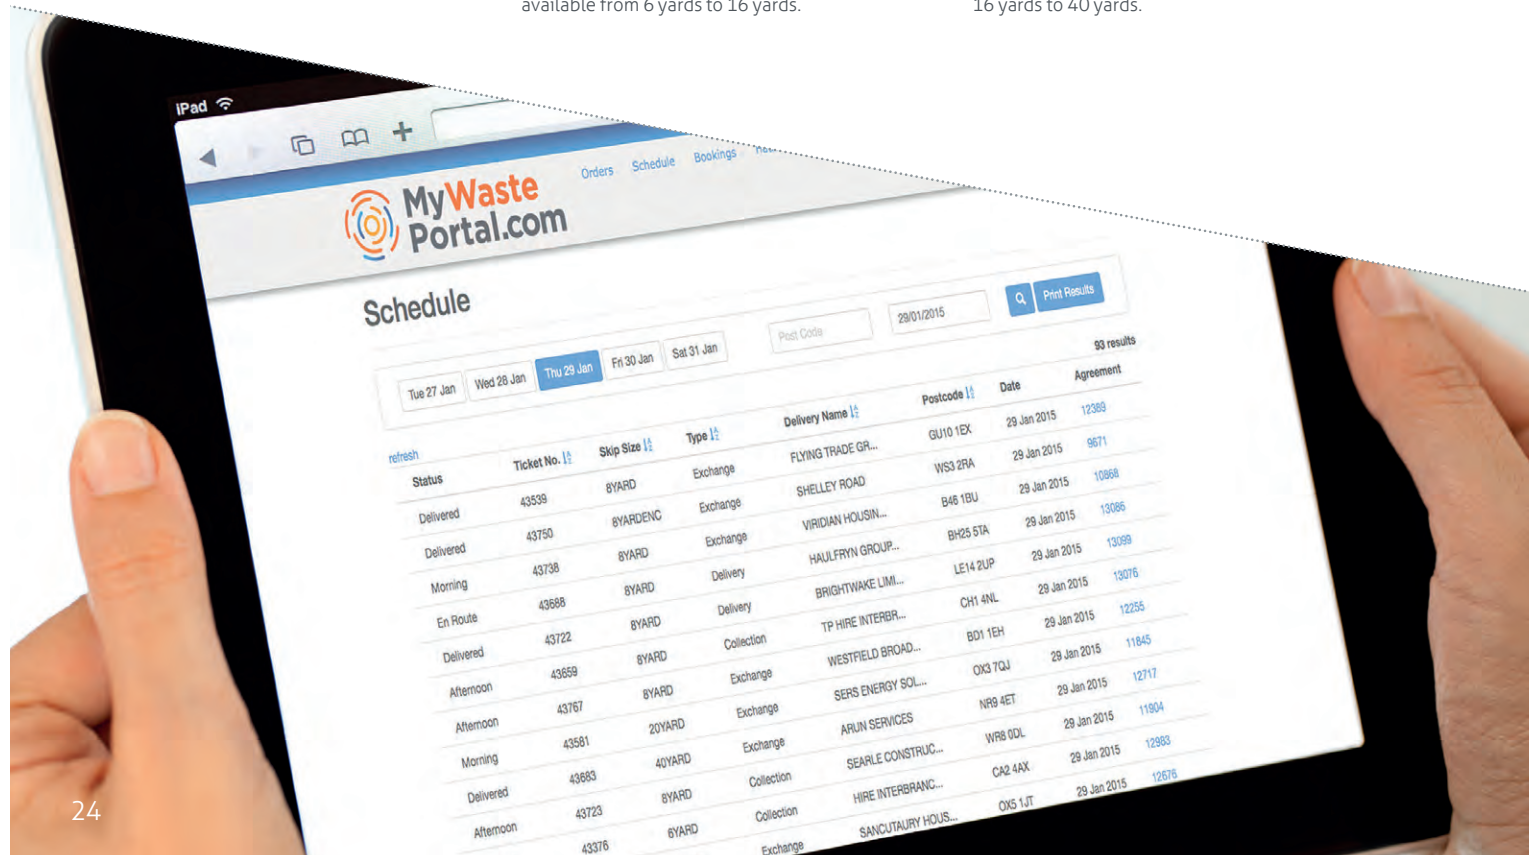

12 YARD
Ideal for bulky items and large amounts of light waste.

ENCLOSED SKIPS
Useful for sites where the location is sensitive or for contaminated waste. A range of sizes are available from 6 yards to 16 yards.

ROLL-ON-ROLL-OFF SKIPS
Typically used by commercial customers for large projects. A range of sizes are available from 16 yards to 40 yards.

THE SITE OF THE FUTURE

Innovation is a priority and Speedy's Product Review Group brings our people, customers and suppliers together to develop new products and enhance our service offering.

We keep up to date with the latest equipment and services to help customers work more efficiently, safely and reduce their environmental impact, bringing you the site of the future, today.

Here is just a selection of the innovative solutions of tomorrow that Speedy can offer you.

SAFETYPPOINT

SafetyPoint is a fold-out safety station, loaded with the necessary first aid and safety equipment to enable your first response.

- > SafetyPoint has been designed to be deployed by 2 people in under 60 seconds
- > Choose the Safety Equipment Pods you need and insert your Health and Safety notices to meet the bespoke needs of each site
- > SafetyPoint provides a single location for the first response equipment to protect your people, your site and your business reputation

TL55 SOLAR LIGHT

The SMC TL55 Solar meets the demand for a sustainable, environmentally friendly and low maintenance lighting tower.

- > Reliable, robust and offering instant light from four LED lamps, the TL55 Solar does not compromise on power or quality
- > With both battery and mains supply provision, it offers flexible options for all applications on site

G-DECK

The G-DECK load deck system is a patented 3 in 1 multi-functional high strength trestle/access platform/tower which is quick to erect, durable and flexible enough to meet any site needs.

CORDLESS TECHNOLOGY

We are proud to stock a full range of power tools from leading manufacturers including Hilti, Makita and Milwaukee.

Benefits of Cordless

- > Reduced Slips, Trips and Falls in the workplace – no trailing cables
- > Often commercially cheaper to hire – no additional generators, cabling etc
- > Less to carry – reduced load meaning less manual handling risks
- > Ideal for lone workers – for example in the Rail sector
- > No refuelling – reduced impact on the environment
- > As powerful and productive as corded equivalents

Geason, now part of Speedy, brings together 15 years of industry experience to offer customers an extensive training solution.

We are able to offer one of the most comprehensive training programmes available today. We have now combined our extensive range of safety and skills courses with a wide variety of apprenticeships, NVQs and professional skills training.

This equips our learners with nationally recognised qualifications and transferable skills, allowing them to work more effectively and safely than ever before.

Safety training courses Include:

- > PASMA Tower
- > First Aid
- > Fire Marshal
- > Manual Handling
- > Site Management - Site Safety Plus
- > Safety Harness Training
- > Confined Space
- > IOSH Managing Safety
- > Working At Height
- > PAT Testing
- > Driver Safety
- > Waste and Environmental Management
- > Plant Machinery – CPCSS, IPAF and NPORSS

FUEL SOLUTIONS MAKING EVERY LAST DROP OF FUEL GO FURTHER

Controlling fuel costs is a vital part of controlling your overall construction budget. And, like all consumables, the better your systems for managing and monitoring its use, the more money you can save.

Now, our fPod® (Fuel Point of Delivery) unit is taking fuel management on site to a new level of efficiency.

fPod® is a secure, self-contained single point refuelling terminal. Delivered direct to your site and serviced by Speedy fuel contractors, it guarantees a constant supply of fuel for plant and equipment.

Because drivers don't need to go off site to refuel, fPod® helps increase productivity. And because only those with approved keycode access can uplift fuel from its pumps, it cuts down on waste and shrinkage while providing you with precise management information on fuel consumption across your project.
